

Full size custom and modified standard keyboards. TG3 has the capability to create a wide range of custom, semi-custom and modified standard keyboards that meet your profile and footprint requirements.

Technology includes Cherry MX keyswitches with high reliability for a long life (50 million cycles); full travel rubber blanket (ideal for high volume where cost is a driving factor). Other complete custom solutions are available as required where traditional technologies don't provide an adequate solution. Options include:

- Enclosures-custom designed plastic or metal
- Pointing devices: track balls, touch pads, custom solution
- Displays
- Rotary encoders
- Biometrics
- Interfaces including: USB, PS2, serial, custom
- Scanners
- Readers
- Customized keycaps and legends

All TG3 products have a minimum one year warranty from date of manufacturer. Additional extended warranty periods available upon request.

TG3 has complete design and manufacturing capabilities to make a keyboard to your exact specifications.
